

IMPROVED ROTARY DISPENSER WITH EXTENDED HANDLE
FOR CREAM, LOTION, GEL OR LIQUID

Abstract of the Disclosure

The dispenser has a rotary dispenser roller mounted on a reservoir with a telescoping handle. The dispensing head preferably has a valve in its supply channel to control and stop dispensing of cream, lotion, gel or liquid fluids for application to the body surfaces. The dispensing head is angled to conveniently apply fluids to most body surfaces. The dispensing head may carry tools thereon for working with the dispensed fluids.
